Comments and Notes:

Location Purpose - MQ - Delivery Location, IJ - Injection Point, MV - Mainline, 7S - Pipeline Segment defined by 1 location (or first of 2 locations), NQ - Pipeline Segment defined by 2 locations (or second of 2 locations), M2 - Receipt Location, SB - Storage Area, WR - Withdrawal Point.

Flow Ind - D - Delivery, R - Receipt, SI - Storage Injection, SW - Storage Withdrawal, BD - Bi-directional  
 Loc Zn - M - Market, P - Production

Loc/QTI - RPQ - Receipt Point(s) Quantity, DPQ - Delivery Point(s) Quantity, SGQ - Segment(s) quantity, MLQ - Mainline quantity, SIQ - Storage injection quantity, SWQ - Storage withdrawal quantity

IT Indicator - Y - At least a portion of the capacity being utilized at this location is interruptible.  
 N - There is not interruptible transportation service as a portion of the capacity being utilized at this location.

All Qty Avail - Y - All quantities are available for reporting.  
 N - One or more of the following is not available for reporting: Design Capacity, Operating Capacity, Operationally Available Capacity, Total Scheduled Quantity

Operating Capacity may differ from Design Capacity based on Btu, location of physical gas received, ambient temperatures, or other related items. Total Scheduled Quantities may exceed Design or Operating Capacities due to imbalance management. For Pipeline Segments and Mainline locations, the Total Nominated, Total Confirmed and Total Scheduled Quantities reflect receipts minus deliveries for Receipt Constraint Areas and reflect deliveries minus receipts for Delivery Constraint Areas. Negative Total Nominated, Total Confirmed and/or Total Scheduled Quantities reflect the movement of gas in the opposite direction of the constraint. Quantity Available may fluctuate depending on Pipeline configuration and loading. For Pipeline Segments and Mainline locations, the IT Indicator shows the use of interruptible capacity in the designated flow direction. Quantity Available reflects Operational Capacity minus Scheduled Quantity adjusted for Estimated No-Notice (when applicable). Estimated No-Notice, when applicable, is forecasted on the basis of anticipated system operations, forecasted weather conditions and the current and historic nomination and usage patterns.

The capacity for Receipt and Delivery locations is intended to provide operational information for points operated by Southern Star only and could be limited by lateral or mainline capacity constraints. All transportation services are subject to the nomination and confirmation procedures as stated in the Southern Star Central FERC gas tariff. Please contact a Southern Star representative if you have a request regarding a specific receipt and delivery location transaction.

Quantities provided for locations 158160 and 158161 do not reflect storage injections or withdrawals related to no-notice activity, but do include quantities from storage withdrawal locations 234060 and 251272 respectively.

TSP Name: Southern Star Central Gas Pipeline, Inc.

TSP: 007906233

# Operational Capacity

CSI035

Post Date: 11/28/2019

Post Time: 12:39:59

Effective Gas Day: 11/28/2019

Effective Time: 09:00 AM

Cycle: ID1

Meas Basis Desc: MMBtu

## Comments and Notes: Continued

<b>Nominated Storage :</b>	<b>Injections</b>	<b>Withdrawals</b>
ISS	Available	Available
IS1	Available	Available
FSS	Available	Available
FS1	Available	Available
FSS Overrun	Available	Available
FS1 Overrun	Available	Available
<b>Line Pack :</b>	<b>Park Or Loan PayBacks</b>	<b>Park Or Loan Withdrawals</b>
PLS	Available	Available
<b>No Notice :</b>	<b>Injections</b>	<b>Withdrawals</b>
Overrun	Available	Available
Out Of Season Injection/ Withdrawal	Available	Available

As of Friday, November 22, 2019 , **Southern Star's Reported Storage Balance** : 83.80 %

### Notes :

1. PLS, ISS, & IS1 availability is subject to the term and requested volume.
2. For Nominated Storage Services, Availability of Service is based on the sum of net injections/withdrawals by Contract.
