Waste Heat Recovery
Potential Locations
February 2016¹

The list below represents those compressor stations on Southern Star Central Gas Pipeline's system that meet or come close to meeting the economic criteria set out in the INGAA White Paper on Waste Heat Recovery of at least 15,000 Horsepower (Hp) operating at or more than a 60% load factor over the previous 12 months.

Location Name ²	Location Legal	Engine Description	Horsepower Rating (ISO)
None Applicable	-	-	-
